## Coastal Gas Rigs

Information Evening with  
**MOSHE BARAK**

**8.00pm Monday 4 June**

---

Are you aware of the campaign to relocate the **Leviathan gas rig**?

If so, you may be interested to attend an informative presentation given by **Moshe Barak** B. Sc. Environmental Eng. Technion IIT, who is an activist currently participating in the effort to bring gas to Israel in a safe manner. The meeting will examine the consequences of the construction of a rig for processing gas from the Leviathan repository, which is planned to be placed during 2019 only 9km from Dor Beach and, subsequently also at Emek Hefer, east of Netanya.

Moshe Barak wishes to highlight the serious consequences resulting from the release of carcinogenic toxins which could result from any malfunction of the rig; such as an accidental leak, an earthquake or a missile strike. Furthermore, as part of the production process of extracting the gas, water rich with heavy metals (such as Mercury) will need to be pumped out of the sea bed and will be poured out near the beach, in close proximity to the desalination plant in Hadera. This, he considers, would create an ecological disaster and potentially destroy our beautiful beaches forever. The Homeland Guardians are a large group of worried citizens who regard this project as a “dangerous and risky plan”.

Do come along to hear more about this important topic, which directly affects all residents of Netanya.

---

**Program takes place at Netanya AACI, 28 Shmuel Hanaziv, Netanya.**

**Tickets: AACI Members Pre-paid NIS 20, at door NIS 25, Non-members NIS 30**
