Alan Stein is a retired mathematician and prolific letter writer who was honored as CAMERA's Letter Writer of the Year in 2015. His letters and op-eds appear frequently in the United States, Israel and Europe. As a long-time president of PRIMER-Connecticut (Promoting Responsibility in Middle East Reporting) and founder of PRIMER-Massachusetts and PRIMER-Israel, he has turned many supporters of Israel into active and effective letter writers. Dr. Stein believes Israelis, particularly Netanya AACI members who can communicate naturally with those living in countries outside Israel, can and should be more effective advocates. Alan's talk will feature some of the truths the anti-Zionists find inconvenient. Israelis can make use of these truths to counter the lies of the anti-Zionists. He urges everyone to frequent the PRIMER ([primerisrael.org](http://primerisrael.org)), CAMERA ([camera.org](http://camera.org)) and Honest Reporting ([honestreporting.com](http://honestreporting.com)) websites and join their email lists. ### Netanya AACI In remembrance of Holocaust Memorial Day Screening of film "No Asylum"

**Where:** Shmuel HaNatziv Street 28, Netanya

**Description:**

No Asylum: The Untold Chapter of Anne Frank's Story The story that's never been told about Anne Frank reveals new information about her father Otto and his struggle to obtain visas and save his family during the Holocaust. The world turned its back on the Franks who were denied refugee status in several countries including the United States. In No Asylum the Franks family relates their struggle before the attic. Otto Frank's recently discovered letters reveal, for the first time, the family's plight. Otto made desperate attempts to secure American visas for his family but very few Jewish refugees were accepted. His pleas for exit visas were rejected and the world turned its back on him, one country at a time. The Franks, with no asylum and no hope, remained helpless as Hitler and his men destroyed their family one by one. Today, 70 years after her death, Anne Frank is a great icon of tolerance, especially to young people. She transcends cultures and borders. The universal message of never again has great relevance today. No Asylum asks if society will look away or finally take action when atrocities due to prejudice and discrimination occur. **Description:**

Far more than 100,000 people, were massacred in a few months by Nazis and Ukrainians in the ravine of Babi Yar, in the first few days most of them were Jews. Last year a Memorial Service was held in Kiev with two compositions by Dr Baruch Berliner, an Israeli-Swiss composer. They combine murder and hope in a unique musical way. After a brief introduction we will screen the film of this Memorial Concert, complemented by photographic insights into contemporary Jewish life of Kiev. Short cinematic transitions show a family on the long death journey to the place of execution. The film closes with a scene of hope: the smile of a little girl. The music: Cain & Abel, the 4th part of the Genesis (Beresheet) symphony, with narrator and orchestra, an emotionally very strong scoring of the first murder in history. Abraham. Oratory for choir, orchestra and narrator: Hope is the musical interpretation of Parshat Lecha, as Abraham Avinu is promised to become a great nation. Baruch Berliner, a mathematician, former senior researcher at Tel Aviv University, author of thousands of poems in several languages, will talk briefly about his music. In honor of Israel's 69th independence day and following the huge success of our many trips to the Israel Intelligence Centre we have put together a day celebrating Israeli innovation, incorporating a unique opportunity to visit the . Its R&D activities include laser and electrooptics, nuclear medicine, radio pharmaceuticals, non-destructive testing, space components characterization and testing, crystal growth, development of innovative radiation detectors and sophisticated equipment and systems for the automatic detection and identification of contraband explosives and drugs. From there we will take a step back in time and visit the Ayalon Institute, which tells of the fascinating and mysterious stories in the history of the struggle for the establishment of the State of Israel. Beneath the ground, and right under the nose of the British, a factory was created for the production of bullets for the Palmach fighters. The site operated under complete secrecy from 1945 until 1948, during which over four million bullets were produced. At our last stop of the day, exploring Israeli innovation, we will meet John Corrie CFO of FuturaGene technologies. He will tell us about how this Rehovot based company is helping a world challenged by growing population, diminishing resources and climate change. John will take us on tour of the laboratories and give us an inside view of developing technologies addressing critical challenges posed by plant yield enhancement.
